

We warmly welcome new residents from several prominent companies, and some smaller ones.

Currently we're pleased to support families from all of these:

	<p>What a great addition the SDDC command is to the Scott AFB community. With new facilities under construction, this group promises a significant permanent presence to our wonderful military family here.</p> <p>While it's a tough move for many of the families coming from the east coast, we can promise this is a great place to live, and we'll try to make it a pleasant transition to a great "next chapter" for your family. We would be pleased to provide company-specific references. We treat these families as "military"see "Military Matters" on OfallonHomes.com.</p>
	<p>SIUE at Edwardsville seems to be getting the jump for the fall semester by bringing in attractive new staff....supported by our Edwardsville office, just around the corner from the campus. We have "Alumni" in all departments.</p>
	<p>We welcome this new entry into the Illinois scene, building the new coal-to-gas facility near Lively Grove. (Now <u>there's</u> a misnomer if there ever was one. And the picture here is NOT from that new plant...but an historic Bechtel project.) We're supporting from our O'fallon office, as most new families want to be on the "city" side of Lively Grove. And while some choose a country town in between, others come all the way to O'fallon or Belleville or Mascoutah to be close to the city (for spousal employment or entertainment,) and to take advantage of schools and "community". We'll help sort out options.</p> 
	<p>Opening a new office soon in Swansea, we welcome several families from central Illinois, and others, destined to staff the new office. We served more than 40 families coming from former Illinois Power Company operations to serve in Ameren's local operations in the last couple of years. As they have found great new communities, you'll enjoy living in SW Illinois. Call the O'fallon office for any information and company specific references.</p>
